The San Saba River Valley.

San Saba is the principal town of San hors, something is dead, not only up the Saba county. It is pleasantly situated in eck, but down the creek and in the hills. the velley of the San Saba, and about half mile from the stream. It is twenty-two SAN SADA. All the fruit has been killed by the late with which it has daily stage connection miles cast to Lometa, a railroad station The San Saba river rises near the plains

and its waters, augmented by numerou The Colorado river also adds to the wa-

ter supply of the eastern portion of the Along the rivers the valleys contain the richest land in Texas. Water is abundant in both streams, and when properly utili-

zed nearly every acre of tillable land can The county is in a prosperous and bealthy condition. It has no indebtedness

Its tax levy is lower than in many other countles in the state. The town is en owered in groves of shade and fruit trees. Under ground pipes of water run through almost every street.

The surrounding valley is under an ascellent state of cultivation. Fields of waying grain and alfalfa and orehards loaded down with delicious fruit meet the eye in every direction.

The town has a delightful aituation and with its pleasant homes surrounded by trees, shrubbery and flowers, its pure water and healthy climate, it is our of the most attractive towns in the state. Mills cetton gins, hotels, business houses, a newspaper, and all the accessories of : thourishing town, are prospering, and as an indication of its rapid growth is cites the fact that new tenement houses are alesting daughters and has always said, that most invariably rented before the founda tions are laid. There is no aivision o somest towns in the west. It is a natural supply point for the west. With also dance of water and a soil of such fenirful ness it will make rapid strides with the next few years towards metropolitan pro portion, with a climate during the entire year that excels that of its famous arno.

The farmers in the San Saba valley under the canals or ditches plants his crops without reference to clouds or signs of rain, totally indifferent to all metreologi cal portent, his acres receive the water needed for the growth of the growing just at the proper time and in the proper quan ity by simply lifting the gate of an irriga ting ditch, and letting the water flow ove the land. Several of these canals or ditches are now in use around San Saba West will grow here! Almost every

product of the temperate zone will floar ish in the San Saha river valley, while all Mir. Entron .- I will dot you a few from the semi-tropical productions for which our part. We have been blessed with a southern California has become famou good rain and the farmers are preparing attain even a greater degree of perfection to take advantage of the weeds. I Guess in the San Saba valleys, and no blemish you know the encklebur grows down this of the scale bug disfigures the golde can look back and see them coming up in adapted to the soil and climate and a snhis tracks. Of we have to rustle and don't perior quality are produced. Alfalfa yields from one to two crops and will aver We are glad to see our friend Rusty, and | age from one to two tons of hay per acre a while he was rounding up some of our each cutting, readily worth \$10 per to county officers, we wish he would hit the in a home market.
